EDUCATION

Full Stack Web Development

Masai School

Nov. 2022 – Aug. 2023

Bachelor of Engineering - Computer Engineering

Savitribai Phule Pune University

Pune

Aug. 2018 – Jun. 2023

COURSEWORK / SKILLS

- Data Structures and Algorithms
- OOPS Concept
- Web App Development
- Git Github

TECHNICAL SKILLS

Languages: Java, JavaScript, Python

Developer Tools: VS Code, Git, IntelliJ IDEA, Cursor, NPM, Netlify, Vercel

Technologies/Frameworks: GitHub, ReactJS, Redux, NextJS, NodeJS, ExpressJS, MongoDB, HTML, CSS, Bootstrap, Chakra-UI

PROJECTS

Facebook Clone 🔗 | React, Express, MongoDB, React Redux, Node.js

🐙 GitHub | 🔗 Live Site

- **User Experience Enhancement:** I developed a Facebook clone with a range of features that enhance the user experience. The home page displays posts from followed users and friends, sorted chronologically for easy browsing. Users can create and style posts with various elements, including text, emojis, backgrounds, and images.
- **Seamless Interactions:** Users react to posts in real-time with options to like, unlike, and remove reactions. The commenting system supports text, emojis, and image uploads with dynamic updates. Users efficiently manage posts, save/unsave, download images, and delete posts.
- **Robust Validation and Personalization:** The project includes robust validation for file uploads, considering both size and type constraints. Additionally, image manipulation features, such as cropping, zooming, rotating, and flipping, are integrated using the Cropper library. Users can personalize their profiles by updating cover and profile pictures with live preview functionality.

Retax CRM System Website 🔗 | React, Chakra UI, Express, and MongoDB

🐙 GitHub | 🔗 Live Site

- **Retax CRM System Website:** Welcome to the Retax CRM System Website! This project is a React-based website inspired by the design and layout of the Retax CRM System on Behance. It aims to provide a user-friendly interface for managing customer relationships and interactions.
- **Learning and Experience:** During this project, I acquired front-end development skills and gained experience in UI design and presentation delivery. This allowed me to enhance my abilities in creating visually appealing and user-friendly websites. I also learned about Express and MongoDB during the development of this project.
- **Live Site:** You can access the live version of the website at the following link: [Live Site](#). To explore the features, you can log in with the following credentials:
- Email: admin@gmail.com - Password: admin@samarjeet
Feel free to navigate through the interface and experience the functionalities firsthand. If you have any questions or feedback, don't hesitate to let me know. Enjoy using the Retax CRM System website! [Live site here](#)

Hand-Sanitizer-website 🔗 | HTML, CSS, JavaScript

🐙 GitHub | 🔗 Live Site

- **Hand Sanitizer Website:** This website was built based on the design from Behance. It serves as an online platform for hand sanitizer products, providing a user-friendly interface for browsing and purchasing.
- **Design Link:** You can find the design inspiration for this project on Behance at the following link: [Design Link](#)
- **Collaboration and Front-End Development:** I collaborated with a team to ensure seamless integration and functionality of the website. Throughout the project, I gained experience in front-end development, particularly in implementing filtering and sorting features to enhance the user experience.
- **Live Site:** You can access the live version of the website at the following link: [Live site here](#)
